Welcome to the June 2005 edition of the Radio HF Internet Newsletter. I would particularly like to welcome another group of new subscribers.

As we roll into the summer months, more of you will probably be spending more time outside and less time inside at your computer and on the Internet. Therefore we may find contributions low again over the next few months. I encourage you though to send along any internet site which you think would be of interest to our readers.

Just as a reference for everyone, including newcomers, the Newsletter is a collection of web sites specifically related to radio (AM/FM, shortwave, Internet radio, amateur radio, scanning and CB), communications, telecommunications, radio memorabilia and collectibles, science, technology, space and astronomy, weather, transportation, plus some fun things thrown in for good measure!

If you come across any web pages which you think our readers would enjoy, please send them along, together with your name and location. You'll probably see your name up in lights in the Contributors Zone!

Our Monthly Special Zone for June features sites about Father's Day and the United Nation's World Refugee Day.

THE MONTHLY SURVEY

LAST MONTH'S SURVEY

Our question from last month dealt with where you spend your time on the Internet. It was "What is your single most important or favourite website which you visit on a regular basis?"

20 responses were received to this question. Some of the web sites appear in this month's edition.

THIS MONTH'S SURVEY

Let's focus on music this month. No matter who we are, music plays some part in our life. We all have our favourite styles and favourite artists. So, this month's question is

"If you could attend a personal concert of one artist or group, alive or dead, still active or from the past, from any era, any style of music, what concert would it be?"

Please send your response, by e-mail, to hfnewsletter@...

RADIO H.F. PUBLICITY ZONE

NEW FROM YAESU
THE VX-6R

The Yaesu VX-6R is a triple band (2M, 220 & 440 MHz) HT with extensive receive coverage, and leading-edge features. It is an easy-to-use "little brother" to the VX-7R, and is both submersible (JIS7: 30 minutes of submersion at depth of 3 feet) and extremely rugged. The VX-6R provides wide receiver coverage at 504 kHz ~ 998.99 MHz (cellular blocked), and puts out 5 Watts of power on the 144 and 430 MHz bands (1.5 W on 222 MHz). The standard memory has 900 channels with 6-digit alpha numeric tag, and 24 memory banks for channel allocation. CTCSS and DCS are built in.

The VX-6R packs features and performance into a compact package measuring just 2.3 x 3.5 x 1.1 inches WHD and weighs only 9.45 oz (with battery and antenna). The Volume and Squelch knobs are oversized, for easy operation.

For more information on this unit, including specification, please see the handheld products page of Yaesu at:

http://www.yaesu.com/

Please contact Radio HF for complete details on pricing and availability of this and other Yaesu products.

RADIO INTEL

http://www.radiointel.com/

VIA Janice Laws, Dorval, Quebec

Web master Ulis Fleming writes about his site: "This is more than my home page but hopefully a tool for SWLs to use while tuning around. Russ K3PI, my Radio Amateur "elmer" from my childhood, and I hope to work up some reviews of radios and accessories. It is our goal to have fun with this. It's a great match! Russ is more interested in MW DXing and I have always been drawn to the world above 1700 kHz but not exceeding 30 MHz."

DX FM

SPACE SOUNDS

http://www.spacesounds.com/

VIA Elmer Standish, Courtenay, British Columbia

Have you ever wondered what Saturn's rings sound like? Or perhaps you're wondering if a black hole or a pulsar makes sounds. Well, you can find out at Spacesounds. Play the sounds as you explore the universe. From the sun's "heartbeat" to the sounds of Big Bang remnants, it's all here. And you've never heard anything like it! There are also recordings from manned space missions.
Listen to ground and spacecraft transmissions from various space missions. There's even President Kennedy's famous "Moon" speech.

FOURMILAB

BOOKS & PUBLICATIONS
NEW TECHNOLOGY FROM THE A.R.R.L.

Voice over Internet Protocol has been getting a lot of coverage in the press around the world, as well as here in Canada. The amateur radio community has been looking at this technology for some time. The ARRL has one of the foremost books on the subject now available.

VoIP: Internet Linking for Radio Amateurs -- by Jonathan Taylor, K1RFD
Growing numbers of hams are using VoIP, or Voice Over Internet Protocol, in combination with their radios for long-distance communication spanning hundreds or thousands of miles. They're using the Internet as the relay between their base stations, handhelds and mobile transceivers.

This is a guide to the four primary VoIP systems used by hams: EchoLink, IRLP, eQSO and WIRES-II. The book is designed for beginners who need information on how to set up and use these systems, but it also provides plenty of technical "meat" for those who want to dig deeper and explore how the systems actually work.

Contents:

Connecting The World
Using A VoIP Link
Conference Servers, Reflectors and Nets
Other Linking Systems
Setting Up Your Own Node
Digital Audio and the Internet
Under The Hood: Echolink
Under The Hood: IRLP
Legal Issues In Linking
Web Resources & Glossary
This may be the first book ever written about ham radio applications of VoIP! Author Jonathan Taylor, K1RFD, is the creator of EchoLink and one of the top experts in Amateur Radio Voice Over Internet Protocol. He is a member of the American Radio Relay League.

137 pages. First edition, © 2004, The American Radio Relay League, Inc.
(ISBN: 0-87259-926-4) #9264 -- $23.50 Canadian

All A.R.R.L. publications, as well as those of the Radio Society of Great Britain, Radio Amateurs of Canada, etc. are available from Radio H.F. Please contact Radio H.F. for complete details, by e-mail at
